

NANDAN S RAJEEVAN

Software Engineer — Python | Backend & API Development

Bengaluru, Karnataka | 9400156703 | nandansr12345@gmail.com

PROFESSIONAL SUMMARY

Python software engineer with 1 year of hands-on experience designing and building REST APIs with Django REST Framework, including authentication, authorization, and role-based access control for production modules. Skilled in optimizing backend query performance, integrating relational databases, and delivering full-stack features end to end. Comfortable working in Agile teams, using Git-based workflows, and quickly picking up new languages, frameworks, and cloud/DevOps tooling.

TECHNICAL SKILLS

Languages: Python, JavaScript

Backend & APIs: Django, Django REST Framework (DRF), REST API design, JWT & session-based authentication, RBAC

Frontend: React, HTML5, CSS3, Bootstrap, Tailwind CSS

Database: MySQL, MySQL Workbench, ORM query optimization

Tools & Practices: Git, GitHub, Postman, VS Code, Agile development, debugging & troubleshooting

EXPERIENCE

Python Web Developer Intern / Softroniics

Sep 2024 – Sep 2025 (1 Year) | Kozhikode, Kerala

Tech: Python, Django, Django REST Framework, MySQL, HTML, CSS, JavaScript, Bootstrap

- Built and maintained RESTful APIs using Django REST Framework (DRF) for core modules including authentication, product management, and orders — directly applicable to microservice and backend API development.
- Implemented JWT-based authentication and role-based access control (RBAC) for 3 user roles (admin, staff, customer), ensuring secure login and data protection in line with security and compliance requirements.
- Optimized Django ORM queries using `select_related` and `prefetch_related`, improving page load speed by 20% — demonstrating performance analysis and debugging skills applicable to backend service optimization.
- Developed responsive frontend interfaces using HTML, CSS, and Bootstrap, ensuring cross-device compatibility across mobile, tablet, and desktop.

Digital Forensics Evidence Examiner / SysTools Software Pvt. Ltd.

Dec 2023 – Jun 2024 | Bengaluru, Karnataka

- Led 100+ hours of digital forensic investigations supporting legal and security outcomes through detailed technical evidence analysis.
- Processed and analyzed 700+ GB of digital evidence across 50+ devices, building strong attention to detail, documentation discipline, and structured problem-solving.

PROJECTS

Fruits & Herbs Online Shopping Platform — Django · React · MySQL · DRF

- Built a full-stack e-commerce web application using React (frontend) and Django REST Framework (backend) for buying fresh fruits and medicinal herbs.
- Integrated JWT-based user authentication, product catalog management, shopping cart, and payment gateway.
- Designed and implemented REST APIs for seamless frontend-backend communication; managed the database with MySQL.

Hotel Management System — Python · MySQL

- Developed a desktop-based hotel management system streamlining room booking, guest check-in/checkout, and billing processes.
- Integrated MySQL for efficient data storage and retrieval, reducing manual processing time significantly.

Weather Forecasting Application — JavaScript · OpenWeatherMap API

- Built a responsive weather app fetching real-time data via a public REST API, with location-based search, temperature, humidity, and 5-day forecast.
- Applied async JavaScript and API integration best practices for optimal performance.

Movie Discovery & Tracking Application — *React · TMDb API*

- Developed a movie discovery platform using React integrated with the TMDb REST API for search, cast details, ratings, reviews, and personalized watchlists.

EDUCATION

B.E. in Software Engineering — Jain University, Bangalore

Class XII — Computer Science — Amrita Vidyalayam, Kerala (CBSE)

CERTIFICATIONS

- Ethical Hacking: Cryptography
- Succeeding in DevOps
- Learning Data Analytics: Foundation
